Jay Jeon conducts capital-asset and business-cycle research, having responsibility for the quantitative development of alpha signals and portfolio construction for multi-asset products. Jay works in close collaboration with the firm's product partners as part of the team that trades and rebalances the firm's asset-allocation strategies. Jay also contributes to the publications of Research Affiliates. Research Affiliates is a global leader in smart beta, factor investing, and asset allocation. The firm creates investment strategies and tools based on award-winning research and delivers these solutions in partnership with some of the world's premier financial institutions.

Prior to joining Research Affiliates, Jay worked in the biotech industry as a product engineer of neural interface devices. He holds a Master of Finance from the University of California, San Diego, and a BS and MS in biomedical engineering from the University of Michigan, Ann Arbor.
